SmartSTORE integrates a fully functional online shop into your existing Blackbaud website and includes all standard shop features: discounts, product attributes, custom postage and many more.

HOW IT HELPS

You no longer need to run two systems: a shop and a website. You can now have your website's shop full integrated with your Blackbaud database.

View our video to see for yourself the many ways in which our clients have utilised this highly configurable solution.

It's immediate. You can be up and running in minutes, no IT support required.

Time saving. No importing of orders required, they feed directly into your database.

Keeps data clean. You can use our optional address lookup, and bank and credit card validation add-ons to ensure your data is clean.

Adaptable SmartSTORE can be customised to you and your team's needs by our experienced developers.

“ I would not hesitate in recommending SmartSTORE as a seamless integration between Blackbaud NetCommunity and Raiser's Edge. ”

Mike Drew ICT Manager,
East Cheshire Hospice
